

**Geometry of Healing**  
**David Laden & Mary Murphy**

**October 18-21, 2018**  
**Prairiewoods Retreat Center Hiawatha, Iowa**

*“This has been one of the most powerful and magical and yet scientific ZB classes I have taken. Principles of quantum physics and field theory – that could potentially be so abstract and hard to grasp – gain structure in that we can access them with our hands through the body.”* **Amanda King, LMT**

This special residential course teaches students how to work directly with energy fields of the body. Students will learn how to access and evaluate vibratory fields, obtain information contained therein, and how to balance and clarify the designated field or material. Students will work with slowed vibratory fields to access "the gap". Much of the theoretical material presented is based on the newer sciences such as quantum physics, holograms, and field theory and how they relate to the world of touch.

**Location: Prairiewoods Retreat Center, 120 East Boyston Rd., Hiawatha, IA 52233**
